Dear Mr. Jensen:

Enclosed is a detailed map of above ground operations on lease ML42844A dated May 30, 2000. Prepared by Johansen and Tuttle Engineering Inc. (Lee M. Swasey) licensed land surveyor on a scale of 50ft. to the inch.

In regards to the close proximity of Miracle Rock Mining and the possibility of Miracle Rock Mining and Dave Taylor mining underground on to our lease, I have sent a letter to Miracle Rock mining and Dave Taylor to which I have received no reply and have been asked to stay off his leases and away from his portals, so I can only give you the information I have at this time.

I understand these are publicly accessed files and would like a copy of Miracle Rock Mining, Dave Taylor's updated plan of operations lease ML42844. Also as lease holder of ML42844A I would like a copy of File# S/015/040 or any file on ML42844A for our corporate files and to give me a base from which to provide accurate information to you in the future.

If any information is received that changes our map of operation a new map will be prepared and sent to you as soon as possible.

A need for confidentiality of information exists due to the relatively new nature of mining this deposit and The Rockland Corporation is not willing to do the competitors leg work for them. So we would like to keep our notice of intention to commence small mining operations and all correspondence confidential until a written release is provided by an officer of The Rockland Corporation.

Thank you for your cooperation in this matter.

A handwritten signature in blue ink that reads 'Bill E. Ruehman'.
Bill E. Ruehman
